

2018 - 2019

Program: Information Technology (NBA Accredited)

Accredited By: National Board of Accreditation, New Delhi

- Vidyalankar is a 'Sanskrit' word combining two words Vidya + Alankar. Where Vidya means knowledge and Alankar means Ornament, the essence being that 'knowledge is the true ornament of a progressive mind'.
- Vidyalankar Polytechic is one of the leading college in Mumbai, approved by AICTE,DTE Maharashtra state and Affiliated to MSBTE. It offers under graduate courses in engineering
- Vidyalankar Polytechnic was established by Vidyalankar Dyanapeeth Trust in 2002 under the dynamic leadership of Shri. C. S. Deshpande with the aim of imparting Technical Education in various fields of Engineering and Technology. It is located at the heart of Mumbai at Wadala(E).
- Courses offered are Electronics and Telecommunication Engineering, Information Technology and Computer Engineering.
- The college has excellent infrastructure for Class rooms, Technical library, Laboratories
 and latest computing facilities.

Vidyalankar Polytechnic

Vision

To achieve excellence in imparting technical education so as to meet the professional and societal needs.

Mission

- Developing technical skills by imparting knowledge and providing hands on experience.
- Creating an environment that nurtures ethics, leadership and team building.
- Providing industrial exposure for minimizing the gap between academics & industry.

Principal Speak

Vidyalankar Polytechnic has always believed in providing quality technical education to the student who aspire to become skilled engineers.

We at vidyalankar put forth for students a challenging ground; tracking them to learn and imply in their career and professional future. Emphasizing to skill and develop their opportunity to widen their innovative horizon.

V-Ideas is compilation of final year student's project ideas that have been processed and developed after fine scrutinizing and tuning by subject expertise. The selected projects were much appreciated by the judges boosting the morale of students.

Technovation the exploration of technology and innovation is the annual project exhibition and competition organised by Vidyalankar Polytechnic for final year students of various branches. Technovation enables students to exhibit and display their innovative skills, thus giving them an opportunity to manifest their hidden skills and ideas. This platform has privileged the students to think in new areas of their skills and present it in the best possible way.

V-ideas culminates V-Technovation 2019

"All of us do not have equal talent. But , all of us have an equal opportunity to develop our talents."

- A.P.J Abdul Kalam

Vidyalankar Polytechnic has always believed in inculcating a synergetic and academic culture in its students, one that encourages them to be innovative and to be passionate about taking their ideas ahead.

V-Ideas are a collection of the final year project ideas of our students that have been nurtured after much rational thinking, fine-tuning and accurate reflection from teachers, guides and subject experts. The ideation stage is quite different from actual implementation; it is comparable to the transition from form to format, the regulated flow of ink from a nib which produces the actual writing. The Institute initiated an innovative idea of assembling the project ideas and transferring them into a hardcover book known as V-Ideas. This collection of projects acts as a future reference for First, Second and Third year students.

As a part of curriculum, students of diploma undertake a project related to their field and demonstrate the knowledge and skills gained on the subject of their choice. Students also take industry based projects for better and live exposure with the industry. The projects selected by the panel of experts are ii regularly monitored by the project guides. The innovative and creative projects are projected in V-Technovation. The projects won many awards at various competitions at other institutes.

V-Technovation provides a platform to diploma students to compete, interact and excel.

Vision

To become a leading center in the domain of Information Technology where learners are introduced to the concepts and implementation of technologies.

Mission

- Encouraging academic excellence and a passion for learning through the use of learner-oriented teaching methodologies.
- Providing an environment that inculcates ethics and effective soft-skills and focuses on the development of learners.
- Establishing and reinforcing a symbiotic institute-industry interface so that learners can gain exposure to real-life applications of Information Technology.

: Intelligent Parking System (IPS)

Domain (Area of Project)

Project Title

: Internet of Things

ame of Project Guide : Ms. Archana Gopnarayan		
lame of Students	: 16202B0001-Amaan Syed	
	16202B0035-Chaitanya Amle	
	16202B0036-Muaviya Momin	
	16202B0005-Sufiyan Khan	

Brief idea of Project : "Intelligent Parking System using Android Application" provides user an easy way of booking the parking slots through an application. To avoid the problem of traffic conjunction in commercial areas that unnecessarily consumes time, this application provides the easy reservation system for parking.

Screenshots of the Project / Photos of Working Model:

Application:

- 1. Can be used in commercial building
- 2. Can be used in malls.
- 3. Can be used in theatre parking.

 Project Title
 : Multi-Features RC Quadcopter

 Domain (Area of Project)
 : Internet of Things (IOT)

Name of Project Guide: Ms.Samidha Chavan		
Name of Students	: 17202B1010-Dheran Salian	
	17202B1002-Niraj Shirkar	
	17202B1004-Nikhil Jadhav	
	17202B1005-Anuj Pathare	
	17202B1007-Roshan Dighe	

Brief idea of Project : The goal of this project is to build, modify, and improve an existing quadcopter kit to obtain stable flight, gather and store GPS data, and perform autocommands, such as One key Return.

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. Search and Rescue.
- 2. Police Code Enforcement/Inspections, Emergency Management, Fire.

Awards if Any for TPP / Competitions / Paper Publication / Any Other Pls. Specify: --Participated in State level competition at SS Jondhale Polytechnic, Asangaon, Raigad.

Project Title : Smart Drainage System using IOT Domain (Area of Project) : Internet Of Things(IOT)

Name of Project Guide:Ms. Archana GopnarayanName of Students: 16202A0004-Furkan Patanwala16202A0012-Ishan Kadam:16202A0017-Neel Kore:16202A0058-Tanvi Gangar

Brief idea of Project : Smart drainage system using IOT. In these System wires are placed to detect the Water Level. When water level rises it is detected by the sensor and then it is send to the ESP WIFI module. Based upon the output values given by the ESP WIFI-Module drainage water levels is send to Thing-speak where the output is displayed and that Website can be monitored by a person. If alert is detected then the person can pass the message to his team and the problem can be cleared at the detected location.

Screenshots of the Project / Photos of Working Model :

Applications:

1. It will be used in Drainage.

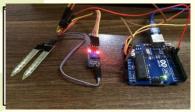

Project Title : Smart Farming Domain (Area of Project) : Internet Of Things

Name of Project Guide	: Mr. Sunil Dodake
Name of Students	: 16202B0014-Sahej Bright
	1520B0001-Devesh Gaonkar
	16202B0004-Abhishek Pandey
	16202B0010- Himanshu Gokharu

Brief idea of Project : The purpose of developing this project is create an automated plant watering system. This project will be a proof of concept based on a single plant, however such a system can be expanded to massive farmlands as well with appropriate upsizing of hardware.

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. Soil and Crop Health can be maintained easily
- 2. Climate monitoring and Storage Condition is not complex.
- 3. The project can be deployed by farmers to manage their huge fields.

Project Title : IoT Enabled Air Quality Monitor With Smart Dashboard Domain (Area of Project) : Internet of Things (IoT)

Name of Project Guides	: Ms.Sridevi Taradi
Name of Students	: 16202B0032 - Pranit Jadhav
	16202B0033 - Amardeep Pote
	16202b0050 - Rohan Juikar
	16202B0053 Gautam Gajara
	17202B0012 - Junaid Dhanwelkar

Brief idea of Project : This project focuses on the monitoring and controlling the air pollution generated by vehicles. It is an real-time embedded system in which, a devices will be attached to Outside, Inside of Industry. When pollution generated by Chemicals, gas goes beyond the threshold value, sensors will detect and then device will give intimation to the owner of Industry through android app. The device monitor all the harmful gas By using Sensor the Real-time sensing values goes to the database and we can get This value from Mobile app. This IoT device helps the Controlling Harmful gas releases from the Industry.

	1620222C0042-Saima Shaiikh		
	16202C0044-Bhagyashri Pawar		

Brief idea of Project : In this project we have presented the design of voice-based navigation system for blind using recognition module and GPS module implemented on Arduino board. This application helps the blind person to navigate.

Screenshots of the Project / Photos of Working Model :

Applications:

1. Using detection and navigation for blind person

Project Title : College Portal Website Domain (Area of Project) : Web Technology

Name of Project Guide	e: I	Ms. Yogita.N.Jore
Name of Students	:	17202B1008-Vaibhav Pandey
		17202B1011-Mhd. Faheem Chaudhary
		17202B1007-Mohsin Sayyed
		17202B1009Mohd. Saif Khan
		17202B1001-Rohit Sorte

Brief idea of Project : Online College Portal (OCP) provides a simple interface for student–faculty information sharing platform. It can be used by educational institutes or colleges to convey the information easily to students. The creation and management of accurate, update information regarding a students academic information(Notice) is critically important for colleges as well as students.

Screenshots of the project:

Application:

- 1. Information sharing platform for PPT, Photos ,Notes, Files, Experiments ,etc
- 2. Urgent rollouts like Attendance sheets, defaulter sheets, Exams related Announcements, etc
- 3. Login is not Mandatory
- 4. Easy and Light Interface so it works on all possible devices and networks
- 5. User customisable homepage and followings

: Courier Management And Map Tracking

Ν

Domain (Area of Project) : Web Technology

Project Title

Project Title : Online Payment using Steganography and Visual Cryptography Domain (Area of Project) : Security

Name of Project Guide: Ms.Archana Gopnarayan		
Name of Students	:16202B0002-Siddhesh Jadhav	
	16202B0003-Shivani Renuke	
	16202B0040-Swaraj Kadam	
	16202B0049-Shubham Manjrekar	

Brief idea of Project : A humongous development in E-Commerce market is seen in the entire world. In this payment system makes use of combine steganography and visual cryptography. This project makes use of an original image which is further divided into two shares that are stored in separate database servers. By using K out of N (K, N) a secret image is encrypted which are trivial images. Only by combining K share with N share makes the image meaningful; an individual part of the original image does not reveal the identity of the original image. Once the original image is revealed to the user it can be used as the password.

Applications:

- 1. For ensuring a safe transaction.
- 2. To safeguard customers credentials.

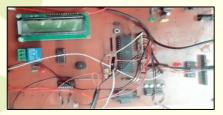

Project Title : Smart Railway System Domain (Area of Project) : Embedded System

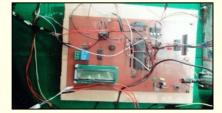

Name of Project Guide: Ms.Tanvi Gursale		
Name of Students	: 16202A0021-Chandani Mourya	
	16202A0048-Shraddha Khedkar	

Brief idea of Project : A "Smart Railway System" helps in controlling tunnel lights and automatically opening and closing the railway gate.

Screenshots of the Project / Photos of Working Model :

Applications:1. In railway system.2. In car parking areas

Project Title : Solar Grass Cutter Domain (Area of Project) : Embedded System

Name of Project Guide: Mr. Sunil DodakeName of Students: 16202A0008-Yash Mhatre
16202A0003-Ritik Vijan
16202A0002-Cynthia Delvin

Brief idea of Project: This is a solar grass cutter which totally eliminates the need of hiring a professional gardener just so the user can tend to his/her garden. The user can sit in their quarters with ease and see their garden being maintained by a machine.

Screenshots of the Project / Photos of Working Model:

Applications:

1. It can be used to save energy required by the electrical grass cutter by using solar power.

Project Title:Pi based ReaderDomain (Area of Project):Embedded system

Name of Project Guide:	Ms.Rupali Sheth
Name of Students :	16202C0015-Shardul Birje
	16202C0036-Yesh Jadhav
	16202C0020-Hitesh Poojary
	16202C0005- Jaagrut Shah

Brief idea of Project: Basically we are working with Raspberry pi in which it takes pictures of text content around its vicinity from the webcam attached to Pi, converts it to speech and speaks out the text through a headphone or speaker connected to its audio jack. The output of text recognized is set to default as English.

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. Pi based Book Reader for visually impaired human.
- 2. Pi based Reader for helping people who have trouble reading.
- 3. Pi based Reader for people who have Literacy issues.

Project Title : Voiceless To Voice Domain (Area of Project) : Embedded System

Name of Project Gui	de: Ms. Chetashri Bhusari
Name Of Students	udents : 16202B0018-Hiteshri Jondhalekar
	16202B0024-Santoshi Parkar
	17202B1003-Reema Yedge
	16202B0034-Pragati Gaikwad
	16202B0058-Sakshi Kapdi

Brief idea of Project : Project aim is to reduce the communication gap between deaf and mute community and normal people. This project will help the people in this we have to used a glove in which the circuit 'flux sensor 'is used. AT mega 8535 is microcontroller used. The used of this converts the analog input data from flux sensor to digital form. A Bluetooth module is use by the microcontroller to send the digital data to android phone.

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. It is used in handicapped or mute person.
- 2. It can also be used in Handicapped Training centre.

: Fire Detector and Extinguisher Robot

Domain (Area of Project) : Robotics

Project Title

Name of Project Guide: Ms.Kalyani Pawar			
: 16202C0023-Shivam Bangar			
16202C0040-Omkar Aachrekar			
16202C0013-Ninad Rayanak			
16202C0003-Soham Lotankar			

Brief idea of Project : In this project we design Arduino based fire detector and extinguisher robot that could move towards fire and pump out water and put down the fire .The advancement of technology especially in robotics it is very much possible to replace humans with robots for fighting the fire. We are going to build Fire Detector and extinguisher robot which will automatically sense the fire by flame sensor and temperature sensor and start the water pump.

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. Can be used in server rooms.
- 2. Extinguishers fire where probability of explosion is high.
- 3. Disaster area monitoring and rescue.
- 4. The main purpose is to rescue the people by extinguishing fire in a building.

Project Title : "7 BOTS" Domain (Area of Project) : Robotics

Name of Project Guide:	Ms. Rupali Sheth
Name of Students :	12202C0186-Karan Ranpise
	16202C0002-Nishant Daund
	16202C0011-Apurva Shinde
	16202C0014-Shreyas Karale

Brief idea of Project: The project is on robotics which contain seven features. It is developed using Embedded C and the software used is kiel version 5. The idea behind this project is to minimize the efforts in industrial area and using the real technology towards the progress of world.

Screenshots of the Project / Photos of Working Model :

Applications:-

- 1. Industrial Applications-These robots can be used as automated equipment carriers in industries replacing traditional conveyer belts.
- 2. Automobile applications-These robots can also be used as automatic cars running on roads with embedded magnets.
- 3. Guidance applications- These can be used in public places like shopping malls, museums etc to provide path guidance.

Project Title:Find Me ADoctorDomain (Area of Project):Database Application

Name of Project Guide	: Ms. Sushma Pawar
Name of Students	: 16202B0045-Sanchit Bhosale
	16202B0046-Jay Patel
	16202B0059-Pooja Phodkar
	16202B0029-Neeraj Dumbare
	16202B0039-Narayan Ligade

Brief idea of Project: This project topic is chosen to help people find nearby medical help required in any kind of medical emergency. The application detects your current location and on the basis of your location it shows you all the medical resources nearby you (i.e. doctor clinics, chemist stores, hospitals).You need to Register in the application using with username and password. The application will also store your medical history.

Screenshots of the Project / Photos of Working Model :

Advantages:

- 1. This application detects your current location and on the basis of your location it shows you all the medical resources near you.
- 2. This application is design to find a nearest and fastest medical help to you in case of any accident or any serious injury or any serious medical issue.

Project Title : Clinic Management System Domain (Area of Project) : Database Application

Name of Project Guide:	Ms. Madhura Mokal
Name Of Students :	16202B0011-Harsh Sukale
	16202B0019-Ganesh Mididoddi
	16202B0017-Shubham Satam
	16201B0005-Dhruyash Mahale

Brief idea of Project: The project clinic management is software developed to simplify the communication process between the doctor and the receptionist. The software would be operated by two users one is doctor and the other is receptionist. Receptionist would be responsible for assigning token numbers to the patient visiting the clinic and save it in the database along with their details.

Applications:

1. User cannot miss any part of the video.

Project Title : Smart City Domain (Area of Project) : Mobile Application

Name of Project Guide : Ms. Yogita Jore Name of Students :16202B0007-Anas Mukri 16202B0013-Om Bagwe 16202B0020-Sakshi Nimkar 162001A0013-Ameya Gadekar

Brief idea of Project : This app will help in emergency cases or to find some specific places when you are in a hurry. In this app we can explore the particular area by specifying the categories . This application will automatically locate our area and display the required places we want from the list . It will also consist a login page so that a user can login or register to it if not a registered before . This application also leads to quicker decision making with respect to places to visit. The usage of this application greatly reduces the time required to search for a place.

Screenshots of the Project / Photos of Working Model :

Applications:

1. It is used in day to day use for faster access of locations, without any waste of time within one click.

Project Title:Online Toll payDomain (Area of Project):Mobile Application

Name of Project Gui	de: Ms.Yogita Jore
Name of Students	: 16202B0012 -Atharva Patkar
	16202B0006 - Apeksha Dhuttargaon
	16202B0008 -Rohit Kerkar
	16202B0030 -Dipti Gosavi

Brief idea of Project : The project entitled Toll Pay is developed taking into consideration of people living in the city. Online toll payment system is an online mobile application project for users to pay their toll online. This application provides an option for users to see all the coming toll throughout their journey and can pay toll online itself. Users simply have to install the application in their mobile. After that user will have to Register into the application and fill the details. The user will than have to put their current Location and Destination. The map than will represent all the tolls in their journey. The user can pay their tolls online in no time spare. After that the invoice will assure that the payment is successful.

Screenshots of the Project / Photos of Working Model :

Name of Project Gui	ue. ws.bhagysann Kukann	
Name of Students	: 16202B0031-Shweta Pai	
	16202B0057- Sneha Sahu	
	16202B0021-Prajakta Londhe	

Brief idea of Project: The Project is an idea which specifies a feature that is based on Geo-Fencing. It triggers a message to the specified Contacts i.e. Parents, Friends ,etc. This App has a Second Feature which helps students to reach their destination location.

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. It is used to inform the Parents/Favourite Contacts where the user is.
- 2. Helps novice Person to locate and find new places.

Project Title : Smart Judge Domain (Area of Project) : Mobile Application.

Name of Project Guide: Ms.Sridevi Patil		
Name of Students	: 16202B0047-Aune khan	
	16202B1011-Istiyak Ahamad	
	16202B0054- Tushar Shetke	

Brief idea of Project : The application will help the Judge of the events competition to judge on android app rather than on paper. The app features all the list of events. It will display all the parameters of judging on which the judge will give points to individual contestents. The name and the scores will be uploaded to the database in realtime . Hence saving a lot of work and valuable time.

Project Title : Emergency call Alert

Domain (Area of Project): Mobile Application

Name of Project Gui	de: Ms.Chetashri Bhusari	
Name of Students	:16202B0016 -Ashish panigrahy	
	16202B0026 Shridhar Chorge	
	16202B0023- Sukhbir Singh khalsa	
	16202B0022 -Abhishek Pramod Singh	

Brief idea of Project : To receive urgent calls and texts when your android smartphones is on silent mode. Silencing our phone always gives us mild anxiety, while our Android phone is muted, our family or boss may be trying to reach to us with some urgent news or task. On the one hand, we want to enjoy some peace and quiet, but on the other, we don't want to come back to a phone with 100 missed calls and countless exclamatory texts.

To help alleviate this dilemma, our group will be showing you an Android app that filters out all of the unwanted call and text alerts based on urgency. The app, is called emergency call alert, and it's perfect for people who utilize silent mode often on their phones. The app also has feature to block the calls that come from sim card customer services

Screenshots of the Project / Photos of Working Model :

Applications:

- 1. It can be used in various Industries.
- 2. It can also be used in Colleges.
- 3. It can be used by home Person also.
