

V-ideas

2015 - 2016

Introduction

- Vidyalankar is a 'Sanskrit' word combining two words Vidya + Alankar. Where Vidya means knowledge and Alankar means Ornament, the essence being that 'knowledge is the true ornament of a progressive mind'.
- Vidyalankar Polytechnic is one of the leading college in Mumbai, approved by AICTE,DTE Maharashtra state and Affiliated to MSBTE. It offers under graduate courses in engineering
- .
- Vidyalankar Polytechnic was established by Vidyalankar Dyanapeeth Trust in 2002 under the dynamic leadership of Shri. C. S. Deshpande with the aim of imparting Technical Education in various fields of Engineering and Technology. It is located at the heart of Mumbai at Wadala(E).
- Courses offered are Electronics and Telecommunication Engineering, Information Technology and Computer Engineering .
- The college has excellent infrastructure for Class rooms, Technical library, Laboratories and latest computing facilities.

Principal Speak

Vidyalankar Polytechnic has always believed in providing quality technical education to the student who aspire to become skilled engineers .

We at Vidyalankar put forth for students a challenging ground; tracking them to learn and imply in their career and professional future. Emphasizing to skill and develop their opportunity to widen their innovative horizon.

V-Ideas is compilation of final year student's project ideas that have been processed and developed after fine scrutinizing and tuning by subject expertise. The selected projects were much appreciated by the judges boosting the morale of students.

Technovation the exploration of technology and innovation is the annual project exhibition and competition organised by Vidyalankar Polytechnic for final year students of various branches. Technovation enables students to exhibit and display their innovative skills, thus giving them an opportunity to manifest their hidden skills and ideas. This platform has privileged the students to think in new areas of their skills and present it in the best possible way.

V-ideas culminates V-Technovation 2016

"All of us do not have equal talent. But , all of us have an equal opportunity to develop our talents." - A.P.J Abdul Kalam

Vidyalankar Polytechnic has always believed in inculcating a synergetic and academic culture in its students, one that encourages them to be innovative and to be passionate about taking their ideas ahead.

V-Ideas are a collection of the final year project ideas of our students that have been nurtured after much rational thinking, fine-tuning and accurate reflection from teachers, guides and subject experts. The ideation stage is quite different from actual implementation; it is comparable to the transition from form to format, the regulated flow of ink from a nib which produces the actual writing. The Institute initiated an innovative idea of assembling the project ideas and transferring them into a hardcover book known as V-Ideas. This collection of projects acts as a future reference for First, Second and Third year students.

As a part of curriculum, students of diploma undertake a project related to their field and demonstrate the knowledge and skills gained on the subject of their choice. Students also take industry based projects for better and live exposure with the industry. The projects selected by the panel of experts are ii regularly monitored by the project guides. The innovative and creative projects are projected in V-Technovation. The projects won many awards at various competitions at other institutes.

V-Technovation provides a platform to diploma students to compete, interact and excel.

V-ideas culminates V-Technovation -2016

Project Title : **Online Project Approval And Students Academics (O.P.A.S.A)**
Domain (Area of Project) : **Networking**

Name of Project Guide : **Prof. Archana Gopnarayan**

Name of Students :

Adesh Apradh (addyadesh4@gmail.com)

Anish Shelte (anish.shelte@gmail.com)

Chinmay Karangutkar (chinuck952@gmail.com)

Mihir Bhanushali (mihir22.bhanushali@gmail.com)

Brief Ideas of Project :

Project management is a major issue faced by many educational institutes. College management gathers all the project reports and project sources from students and store them somewhere. To overcome this problem we have thought of developing a web-based application which will provide the safety of their abstract .

Screenshots of Project / Photos of Working Module :

Applications :

OPASA can be used by students in schools, colleges for their project abstract purpose. Since OPASA is accessed by the internet, it can be accessed globally

Neha Shewale (shewaleneha4@gmail.com)

Saurabh Pawar (saurabhpawar148@gmail.com)

Vatsal Kotecha (vatsal.jkotecha@gmail.com)

Brief Ideas of Project :

Our project is based on hotel website that is to reduce the man power. Tabs will contain the website , the customer need to login and order . The chef will have another tab where he will be able to see the orders and the waiter will place the order to the respective table number . Our page will contain information about the restaurant as well as our contact number and even offers.

Screenshots of Project / Photos of Working Module :

Applications :

1. Can be used in any small or big restaurant.
2. Can be used in any school or college canteens.

Name of Project Guide: Prof. Sridevi Taradi

Name of Students :

Raunak Joshi (jimmy.lpf@gmail.com)

Sanket Shelar (shelarsantosh942@gmail.com)

Muzammil Shaikh (muzammilshaikh866@yahoo.in)

Tejas Mane (rajeshwarimane7@gmail.com)

Brief Ideas of Project :

The project works by using the third party interference in order to establish a remote connection between 2 devices of different backgrounds. The operation we used was between windows and android, where the windows can be manipulated remotely using android. The third party was a database server through which windows will fetch the commands and android would transmit the commands in order to fulfill them. Hence the sever acts as third party.

Screenshots of Project / Photos of Working Module:

Applications :

Remote access of tasks of windows using android wireless.

File Manipulation.

Runner –up in Final Year Project Exhibition

Department : Information Technology

Project Title

: Android app for electric bill meter reading

Domain (Area of Project)

: Mobile Application

Name of Project Guide : Prof. Ritu Talreja

Name of Students :

Manasi Berde (mansi.berde24@gmail.com)

Akshay Sadalgekar (akshaysadalgekar95@gmail.com)

faisal Jogilkar (jogilkarfaisal67@gmail.com)

Ibrahim Khan

Brief Ideas of Project :

Meter reading and billing are complex tasks of electricity supplier companies . The current technology of billing process uses manual process of meter reading .updating the server with reading and billing customer. We are suggesting the technology that includes android application and web application to get reading. Updating server and informing consumer about bill unit and amount.

Screenshots of Project / Photos of Working Module :

Applications :

It is a mobile android application

Customer get instant update so he gets extra time to pay bill

Awards if Any for TPP / Paper Publication / Any Other Please specify :

Project Title
Domain (Area of Project)

: Android Based Remote Contact Access
: Mobile Application

Name of Project Guide : Prof. Sunil Dodake

Name of Students :

Sameer Rajbhar (rajbharsameer54@gmail.com)
Atharva Thanekar (atharvathanekar@gmail.com)
Akshay Rane (akkyrane@gmail.com)
Vighnesh Shetty (vighneshshetty26@gmail.com)

Brief Ideas of Project :

If you have forgotten your Cell Phone at home and you need to call a person urgently whose contact number is not available at that instant. In that case you have to call home and ask someone to search for that contact and then resend it back to you. It takes your lot of time. Instead of doing this tedious process one can send an SMS from someone's cell to his/her own mobile in a predefined syntax.

Screenshots of Project / Photos of Working Module :

Applications :

You can use this system to access contact in your phone remotely.
You can also use this system to access unread SMS in your phone.

Aditya Chipkar(achipkar5@gmail.com)

Sarvesh Sawardekar(sskenrock@gmail.com)

Brief Ideas of Project :

In Mobile Hotspot, if anyone hacks the network, then Host (Hotspot Creator) doesn't get any information about it. To stop such activities and to allow host to monitor its hotspot network easily, the system is satisfying all the needs. Due to this system, Every Host will provide their Hotspot very faithfully and confidently.

Screenshots of Project / Photos of Working Module :

Applications :

- Can be used in any mobile of android platform.
- Can be used monitor any hotspot or discover the MAC Address

Project Title : E-Canteen
Domain (Area of Project) : Web Technology

Name of Project Guide : Ketan Bagede

Name of Students :

Anup Singh (anup.singh@gmail.com)

Jignesh Chauhan (jignesh12@gmail.com)

Shree Madhav(shree.m@gmail.com)

Akhil Singh (akhil.singh@gmail.com)

Brief Ideas of Project :

E-Canteen is an android based application where the server is being used in particular office, collage etc, can use this application to order food from anywhere in campus. The application saves time and is used for fast process without waiting for the order in queue. In this Project Java, XML, Android SDK,MYSQL is used.

Screenshots of Project / Photos of Working Module :

Applications :

- Offices
- Canteen

Project Title : Vidyalankar Polytechnic Andriod Application
Domain (Area of Project) : Mobile Application

Name of Project Guide : Prof. Sonal Gupta

Name of Students :

Rutali Naik (rutali.naik@vpt.edu.in)

Vaishnavi Shinde (vaishnavi.shi@vpt.edu.in)

Parag Chirmule (parag.chirmule@vpt.edu.in)

Waseem Ali (waseem.ali@vpt.edu.in)

Brief Ideas of Project :

In this project, we have designed software named “Vidyalankar Application” that allows easy and user friendly interface between the teachers and students. This software is implemented on a mobile phone and the student can perform different operations and get the information. The Admin will add all the recent information and update them. This software is easily feasible for every user.

Screenshots of Project / Photos of Working Module :

Applications :

- Accessible anywhere, anytime.
- Conveniently controlling and monitoring.
- Instant notification

Project Title : **Android based E menu**
Domain (Area of Project) : **Mobile Application**

Name of Project Guide : Mrs. Supriya Angne

Name of Students :

Darshana Rane (darshana.rane@gmail.com)

Varsha Jain(varsha.jain@gmail.com)

Manjiri Dolas(manjiri.dolas@gmail.com)

Manasi Rahate(manasi.rahate@gmail.com)

Brief Ideas of Project : This project deals with digital ordering system for restaurant this system assist restaurant management groups by enabling customers to immediately makes orders on their own selves. This minimizes the number of minute to wait for the meal serving

Screenshots of Project / Photos of Working Module :

Applications :

- It can be used in restaurant to order menu.
- It can be used in any shop to order item which is sold in that shop

Industrial Project : No

Department : Computer Engineering

Project Title : **Where is my Lecture? (Campus Mapping and Navigation)**
Domain (Area of Project) : **Mobile Application**

Name of Project Guide : Meenakshi Khamkar

Name of Students :

Akhil Pisharody (Akhil.Pisharody @vpt.edu.in)
Rohan Pawar (Rohan.Pawar @vpt.edu.in)
Mark Duarte (Mark.Duarte @vpt.edu.in)
Raj Bhilare (Raj.Bhilare@vpt.edu.in)

Brief Ideas of Project :

'Where is my Lecture ?' Is a campus mapping and navigational android application. We have developed this navigational application which will be helpful to the students and the guests arriving at our campus to find classrooms and laboratories.

Screenshots of Project / Photos of Working Module :

Applications :

- Easy for new students and guests to reach their classrooms or laboratories.

Awards if Any for TPP / Paper Publication / Any Other Please specify : No.

Project Title : **Android Location Alarm**
Domain (Area of Project) : **Mobile Application**

Name of Project Guide : **Mrs. Supriya Angne**

Name of Students :

Kartik Singrakhia (kartik.singrakhia@gmail.com)
Shivam Sutar (shivam.sutar@gmail.com)
ShubhamMaurya(shubham.maurya@gmail.com)
Arman Merchant (arman.merchant@gmail.com)

Brief Ideas of Project : This application allows the user to manually place an alarm and then the alarm will trigger when the location is arrived, it includes automatic activation of the alarm and deactivation based on the location of the user.

Screenshots of Project / Photos of Working Module :

Applications :

- It can be used for load balancing
- It can be used in any location positioning system.

Awards if Any for TPP / Paper Publication / Any Other Please specify : No.

Department : Computer Engineering

Project Title : **Holographic Video Player**
Domain (Area of Project) : **Mobile Application**

Name of Project Guide : Mrs. Supriya Angne

Name of Students :

Saideep Dicholkar (saideepdicholkar@gmail.com)

Darshan Tandel (darshantandel50@gmail.com)

Omkar Baswat (okbaswat1341998@gmail.com)

Jigar Panchal (panchaljigar82@gmail.com)

Brief Ideas of Project :

The software will take input of a video file and play it in 4 different angles so the resulting projection of image will appear to be realistic and 3D. The videos that the software will play will be projected on the Holographic Pyramid and the user can watch the Holographic view on this Pyramid.

Screenshots of Project / Photos of Working Module :

Applications :

- It can be used in Medical field to easily understand about the Human Anatomy and Biology
- Marketing with 3D Holographic display
- Holographic Demo of Product at its Launch Event

Industrial Project :

Successfully completed Industrial Project assigned by L&T Institute of Technology.

Project Title : Home Appliance Control Using Android Application.
Domain (Area of Project) : Embedded System

Name of Project Guide : Chetana J. Kolte

Name of Students :

Varad Sarpole (varadsarpole@gmail.com)

Siddesh Kotian (kotiansiddesh07@gmail.com)

Abrar Shaikh (abrarshaikh409@gmail.com)

Aditya Kamble (royalakenfield@gmail.com)

Brief Ideas of Project :

This project helps to control the electrical loads with the help of android application.

This system solves the issue by interfacing a unit with home appliances that switches these loads based on the input received from android device.

Screenshots of Project / Photos of Working Module :

Applications :

1. Auditoriums and theatres
2. For Handicapped people
3. Hospitals

Awards if Any for TPP / Paper Publication / Any Other Please specify :No

Department : Computer Engineering

Project Title : **Breath Controlled Wheel chair**
Domain (Area of Project) : **Embedded System**

Name of Project Guide : **Vijay.T.Patil**

Name of Students :

Hasnain Shaikh (hasnains312@gmail.com)

Izhar Ansari (izhar93200@gmail.com)

Roshan Ray(roshanrayy123@gmail.com)

Prem Gane (premgane 97@gmail.com)

Brief Ideas of Project :

The objective of this work is to model the system made up for a person with disability called electric wheelchair. The project "Breath Control Wheelchair" is basically a wheelchair wherein it is control with the inhalation and exhalation of breath using mic and signal conditioning circuit. Depending upon the breath taken in and out, the wheelchair will move into Forward, Backward, Left and Right directions.

Screenshots of Project / Photos of Working Module :

Applications :

- Paralyzed person can handle his wheelchair without depending on any other person.
- A person who is disabled with legs, arm, or any other body part except eye or who can't speak even such a person also can handle his wheelchair independently.

Awards if Any for TPP / Paper Publication / Any Other Please specify :

NATIONAL LEVEL PROJECT COMPETITION 2nd , STATE LEVEL PAPER 1ST

Department : Computer Engineering

Project Title : Gesture Control Robot
Domain (Area of Project) : Embedded System

Name of Project Guide : Prof. Sonal Gupta

Name of Students :

Kajal Jadhav (kajal.jadhav@vpt.edu.in)

Sagarika Chanekar (sagarika@vpt.edu.in)

Bhagyashree Kadam (bhagyashree@vpt.edu.in)

Brief Ideas of Project :

In this project various methodologies have been analyzed and reviewed with their merits and demerits under various operational and functional strategies. Thus, it can be concluded that features like user friendly interface, light weight and probability of android OS based smart phone has been overtaken the sophistication of technologies like static movement, etc., making them obsolete.

Screenshots of Project / Photos of Working Module :

Applications :

1. Remote control with the wave of a hand of various devices is possible.
2. Helpful for handicapped and physically disabled people to achieve certain tasks, such as driving a vehicle.
3. Can be used to control interactions for entertainment purpose such as gaming to make the game players experience more interactive or immersive

Awards if Any for TPP / Paper Publication / Any Other Please specify : No

Department : Computer Engineering

Project Title : Fully Automated Solar Grass Cutter
Domain (Area of Project) : Embedded System

Name of Project Guide : Sangeeta Wankhade

Name of Students :

Pranav Nikam (nikampranav70@gmail.com)

Shubham Jagushte(shubhamjagushte24@gmail.com)

Rohit Sunar (rohitsuinar31@gmail.com)

Shubham Sorap (shubham.sorap@gmail.com)

Brief Ideas of Project :

The fully automated solar grass cutter is a fully automated grass cutting robotic vehicle powered by solar energy that also avoids obstacles and is capable of fully automated grass cutting without the need of any human interaction.

Initially Grass Cutting was dependent totally on Human Efforts or grazing of animals. After few years grass cutting machines were introduced.

Screenshots of Project / Photos of Working Module :

Applications :

- All playgrounds.
- Lawns and gardens.

Awards if Any for TPP / Paper Publication / Any Other Please specify : No

Department : Computer Engineering

Project Title : Solar based street lamp control
Domain (Area of Project) : Embedded System

Name of Project Guide : Vijay Patil

Name of Students :

Pranav Chandran (pranavc@gmail.com)

Tanmay Salekar (tanmay.21@gmail.com)

Kunal Patil (KP23@rediffmail.com)

Adil Khan (adilk@gmail.com)

Brief Ideas of Project :

The main aim of this project is to control the street light using android and the use of solar panel gives us the knowledge or an idea of how a use natural resources and use for different purposes.

Screenshots of Project / Photos of Working Module :

Applications :

- Solar street lights are independent of the utility grid and hence the operation costs are minimized.
- Maintenance is less as compared to conventional street light
- Solar based street light is useful in remote area where electricity is not possible.

Project Title : Spinning LED PC Controller
Domain (Area of Project) : Embedded System

Name of Project Guide : Chetana J. Kolte

Name of Students :

Ankita Vinod Babshetye (babshetyeankita@gmail.com)

Ruchira Ashok Ambule (ambuleruchira16@gmail.com)

Vaibhavi Deepak Dalvi (dalvi959vaibhavi@gmail.com)

Vaishnavi Pednekar (pednekarvaishnavi97@gmail.com)

Brief Ideas of Project :

The project consists of Spinning LED display using PC control which displays the messages send by the user at the handheld device i.e via GSM mobile. if there are no inputs from the user for the system, the message that is programmed in the microcontroller will be displayed continuously

Screenshots of Project / Photos of Working Module :

Applications :

1. College campus
2. Government units
3. Offices
4. Schools
5. Stock Market

Awards if Any for TPP / Paper Publication / Any Other Please specify : No

Department : Computer Engineering

Project Title : Flex sensor based gloves for mute people
Domain (Area of Project) : Embedded System

Name of Project Guide : Manisha Pokharkar

Name of Students:

Prajakta Sawant (sawnat.prajakta@gmail.com)

Kashika Wanchoo(kashika.wanchoo@gmail.com)

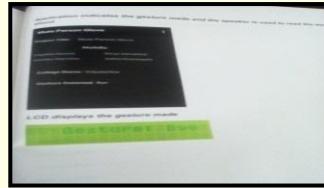

Shruti Adhivarekar (adhivarekar.shruti@gmail.com)

Ankita Khandagale(ankita.khandagale@gmail.com)

Brief Ideas of Project :

The objective of this work is to design a glove with flex sensors. Depending upon the gestures of the figure the required sign is deducted and display on the LCD. This method ensures effective communication.

Screenshots of Project / Photos of Working Module :

Applications :

- It can be used by dumb and deaf students who find it difficult communicating to people unaware of sign language.
- It can be used by mute employees who work in software companies.

Awards if Any for TPP / Paper Publication / Any Other Please specify :No

Department : Computer Engineering

Project Title

: Controlling LED Bulbs on solar energy

Domain (Area of Project)

: Embedded System

Name of Project Guide : Meenakshi Khamkar

Name of Students :

Pranil.Bhilaré (Pranil.Bhilaré@vpt.edu.in)

Viraj Kadam (Viraj.Kadam@vpt.edu.in)

Akash Bamne (Akash.Bamne@vpt.edu.in)

Omkar Angane (Omkar.Angane@vpt.edu.in)

Brief Ideas of Project :

This project develops a smart LED lighting system, which is controlled by Android apps via handheld devices, for eg. smartphones, tablets and so forth. The status of energy use is reflected by readings displayed on a handheld device and it is treated as a criteria in the lighting mode design of a system.

Screenshots of Project / Photos of Working Module :

Applications :

- Hospitals, Banks and other Big Organization can control their systems
- Street light automation using LDR sensor

Awards if Any for TPP / Paper Publication / Any Other Please specify : No

Department : Computer Engineering

Project Title : Propeller Clock
Domain (Area of Project) : Embedded System

Name of Project Guide : Prof. Poonam Pandhire

Name of Students :

Prajay Mankar (mankarprajay@gmail.com)

Aniket Patil (herr.aniket@gmail.com)

Siddhesh Hemade (siddhesh12hemade@gmail.com)

Yash Samel (yashsamel028@gmail.com)

Brief Ideas of Project :

The Propeller Clock is an electronic device which has a series of LEDs on board that rotate with the help of a motor to give an illusion of a watching a clock (Digital or Analogue). This requires a DC motor which rotates the PCB connected to it with sufficient speed so as to create the illusion.

Screenshots of Project / Photos of Working Module :

Applications :

- It can be used as low cost LED display.
- It can also be used as a futuristic clock display.

Awards if Any for TPP / Paper Publication / Any Other Please specify : No

Department : Computer Engineering

Project Title : Home Automation System Using GSM
Domain (Area of Project) : Embedded System

Name of Project Guide : Mr. Siddhesh Vaidya

Name of Students :
Sushan Sahu (sshau@gmail.com)
Soman Sunar (soma@gmail.com)
Jerry D'Souza(jds20@gmail.com)

Brief Ideas of Project :

Home automation is the residential extension of building automation and involves the control and automation of lighting, heating, ventilation, air conditioning (HVAC), appliances, and security. Modern systems generally consist of switches and sensors connected to a central hub sometimes called a "gateway" from which the system is controlled with a user interface that is interacted either with a wall-mounted terminal, mobile phone software, tablet computer or a web interface.

Screenshots of Project / Photos of Working Module :

Applications : Adds Safety Through Appliance and Lighting Control, Secures Home Through Automated Door Locks

Shriya Namgure (sh.nm@ gmail.com)
Nitisha Dalvi (nitisha@gmail.com)
Mrunali Shirodkar (mr.sh @gmail.com)
Supriya Nalawade (priya @ gmail.com)

Brief Ideas of Project : This project will produce oxygen and hydrogen from waste water. Oxygen tree is revolutionary lightening concept that represents symbiosis between pioneering design and eco compatible technology

Screenshots of Project / Photos of Working Module :

Applications :

- It is used for advertisement display.
- It is useful in in producing oxygen for human being.

Awards if Any for TPP / Paper Publication / Any Other Please specify : No

Department : Computer Engineering

Project Title : Automated Irrigation
Domain (Area of Project) : Embedded System

Name of Project Guide : Manisha Pokharkar

Name of Students:

shruti Adhav (shruti.adhav@gmail.com)

Pranali Mandve (mandve_pranali@gmail.com)

Kiran Varpe (varpe_Kiran@gmail.com)

Soanli Sarap (sonali.sarap@gmail.com)

Brief Ideas of Project :

The objective of this work is to design a small-scale automated irrigation system that would use water in a more efficient way, in order to prevent water loss and minimize the cost of labour.

Screenshots of Project / Photos of Working Module :

Applications :

- If we unable to drag houses and sprinklers or we are just tired of manually irrigating and automated system could be the ticket.

Department : Computer Engineering

Project Title : IVRS
Domain (Area of Project) : Embedded System

Name of Project Guide : Prof. Sonal Gupta

Name of Students :

Anubhav Raman (anubhav@gmail.com)

Romaan Shaikh (shaikh@gmail.com)

Sarthak Ambardekar (sarathi.ambardekar@gmail.com)

Saumitra Purandare (saumitrapurandare@gmail.com)

Brief Ideas of Project :

Our project allows the user to know the student's attendance and marks quickly through the mobile without the intention of the college authority. Presentation in the class and outcome of the university are made reachable to the parents by our project. The Interactive Voice Response (IVR) System serves as a bridge between people and computer databases by connecting the telephone network with the database.

Screenshots of Project / Photos of Working Module :

Applications :

- Business are currently using speech enabled IVRS in the following ways: -
- Package tracking, Stock quotes and trading, Insurance clamming, Travel booking

Name of Students :

Pawan Gupta
Abhishek Jaiswar
Amit Singh
Ashwin Kadam

Brief Ideas of Project :

Overall style of the system As shown within the diagram the system consists of assorted water quality measuring sensors like PH, turbidity, conductivity and temperature, ADC, microcontroller 8051, GSM module and LCD. The water quality measuring system uses pH, turbidity, conductivity and temperature device to measure the standard of water.

Screenshots of Project / Photos of Working Module :

Applications :

This system is used in commercial and domestic use.
Water supply agencies.

No award

Department : Electronics And Telecommunication

Project Title : GSM Based Car Parking System.
Domain : Communication

Name of Project Guide: Prof. Pranesh Naik

Name of Students :
Komal Bangar.
Khan Zobia Samin.
Priyanka Waje.

Brief Ideas of Project:

- 1.The project involves a system including infrared transmitter and receiver in very lane and a LED & LCD display outside the car parking gate.
2. So the person entering parking area can view the LED display and can decide which lane to enter so as to park the car.

Screenshots of Project / Photos of Working Module :

Applications :

1. Parking in shopping malls.
- 2.Parking in college areas.

Awards if Any for TPP / Paper Publication / Any Other Please specify :

1. V-Technovation (Consolation prize).

Department : Electronics And Telecommunication

Project Title : Automatic Bottle Filling System Using PLC
Domain (Area of Project) : Control Systems

Name of Project Guide : Prof. Imran Sayyed

Name of Student :
Amit Shanbhag
Pratik Talekar
Pritesh Jaiswar
Arundhati Khot

Brief Ideas of Project :

When we switch on the power supply whole process starts. First the motor starts rotating so when the bottle comes in front of inductive sensor motor stops because sensor detects the foil mounted around the bottom part of bottle, so the solenoid will turn on and water starts filling into the bottle,

Screenshots of Project / Photos of Working Module :

Applications :

- Water Management system
- Process industries

Awards if Any for TPP / Paper Publication / Any Other Please specify :
Runner Up's in VP TECHNOMANTRA Project competition

Department : Electronics And Telecommunication

Project Title : LED based street light system with auto intensity control from solar panel
Domain (Area of Project) : Control systems

Name of Project Guide : Prof Shrinivas Paivernekar

Name of Students :

Aniket Karande
Jinesh Pithadia
Sanmesh Kamble
Omkar Rawool

Brief Ideas of Project :

The project is designed for LED based street lights with auto intensity control using solar power from photovoltaic cells. Photovoltaic panels are used for charging batteries by converting the sunlight into electricity. A charge controller circuit is used to control the charging. [Intensity of street lights](#) is required to be kept high during the peak hours. As the traffic on the roads tends to decrease slowly in late nights, the intensity can be reduced progressively till morning to save energy. Thus, the street lights switch ON at the dusk and then switch OFF at the dawn automatically. The process repeats every day.

Screenshots of Project / Photos of Working Module :

Applications : In area of energy conversion and conservation

Project Title : Automatic Shifting Of Road Divider Using Solar Panel
Domain (Area of Project) : Control Systems

Name of Project Guide : Mr.Vinit Mhatre

Name of Student :
Mayur Donwalker
Muktesh Samant
Rohit Mudalkar
Abhishek Wadkar

Brief Ideas of Project : Road Divider is generically used for dividing the Road for ongoing and incoming traffic . This helps keeping the flow of traffic

Generally there is equal number of lanes for both on going and incoming traffic .

Static Road Dividers -These are generically available Road Dividers today which are generally static . They can be sometimes moved yet the whole process is manual and needs human intervention . Human intervention doesn't make it feasible to shift the divider frequently .

Project Title : Indra Shower
Domain (Area of Project) : Embedded System

Name of Project Guide : Rohit Sharma

Name of Students :
Shubham Churry
Siddharth Naik
Prasad Sate
Tanmay K.

Brief Ideas of Project : In this project we talk about an irrational implement of the water problems and how to solve it.

We propose an automatic shower. In this first stage of development of this project, we implemented a presence sensor that covers an area in which to detect the user, and flow of water circulating in the pipes. For this simulation stage the water will be driven by a submersible pump, but in its implementation stage, the water flow will be given by a solenoid. Water consumption will be counted by a flow meter.

Screenshots of Project / Photos of Working Module :

Project Title : Gas Level Sensor And Gas Leakage Detector
Domain (Area of Project) : Embedded systems

Name of Project Guide : Mrs. Kirthi Gupta

Name of Students :

Vedant Ojha
Usaman Shaikh
Gulam Sayed
Ismail Solkar

Brief Ideas of Project :

We see our moms working in kitchen every day. It is quite difficult to manage us as well as all the house hold. Cooking is one department where our demands never end. We want different dishes every day and they try their best in fulfilling our wishes. But along with cooking comes the tension of when we may run out of gas and eventually it adds up to the problems of no gas or borrowing gas or ordering food from outside.

Screenshots of Project / Photos of Working Module :

Applications :

To measure weight of gas.to check gas leakage.

Awards if Any for TPP / Paper Publication / Any Other Please specify :

Department : Electronics And Telecommunication

Project Title : Car over speeding detection
Domain (Area of Project) : Embedded System

Name of Project Guide : Kalyani Vaidya

Name of Students :

Onkar Sawant
Shoeb Syed
Gomoji
Sahil Ansari

Brief Ideas of Project :

Our proposed project aims to develop a system that detects cars driving at speeds over specified limit and inform concerned authorities immediately. Road accidents occurrences have increased recently so there needs to be a system that allows to detect overspeeding cars. Current speed detection systems are handheld guns held by police personnel that allow them to check car speed and then manually inform authorities about the vehicle.

Screenshots of Project / Photos of Working Module :

Applications :

- 1.This can be used at Highways (National Highways, State level Highways).
- 2.This project can also be used inside university campus areas or inside any company's premises.

Project Title : Variable Frequency Drive
Domain (Area of Project) : Power Electronics

Name of Project Guide : Prof Sandhya Kumar

Name of Students :
Tanmay Mahatre
Aamir Ali Lore
Farooq Shaikh
Shabhaz Choudhari

Brief Ideas of Project :

A Variable Frequency Drive (VFD) is a type of motor controller that drives an AC motor by varying the frequency supplied to the AC motor i.e it controls the speed of the AC motor by controlling the frequency supplied to it. In order to control the RPM , the VFD generates a sine wave of the desired frequency which is supplied to the motor for a desired RPM .

Screenshots of Project / Photos of Working Module :

Applications :

For less Power Consumption in Industry
VFDs improves product quality, and reduces production cost in Industry.

Awards if Any for TPP / Paper Publication / Any Other Please specify :

Project Title : Bus Boarding System For Blind
Domain (Area of Project) : Bio-Medical Engineering

Name of Project Guide : Monicka More

Name of Students :

Aumkar N. KASAR <Aumkar.Nk1@gmail.Com>

Rohan B. RANE <Rohanrane101@gmail.Com>

SANDESH DAVANE <Sandeshdavane@gmail.Com>

Brief Ideas of Project :

The zig-bee based bus boarding system is basically a device which is fitted on a BEST bus which tracks the presence of the visually impaired passenger across its daily route which ensures the ease of travelling for the visually impaired. The zig-bee based bus boarding system is made as a prototype to solve the problems faced by the visually impaired passenger while travelling mainly during boarding and navigating the bus.

Screenshots of Project / Photos of Working Module :

Applications :

- Assistance for the blind for boarding buses.
- Provide the blind with an ability to travel independent using public transport.

Awards if Any for TPP / Paper Publication / Any Other Please specify :

Consolation prize winner in the collage competition.

Department : Electronics And Telecommunication

Project Title : Transcutaneous Electrical Nerve stimulator
Domain (Area of Project) : Biomedical

Name of Project Guide : Prof. Shilpa Gaikwad

Name of Students :
Shubham K.
Chaitang Shah
Rajesh Yadav
Ajit Shinde

Brief Ideas of Project :

Transcutaneous electrical nerve stimulation (TENS or TNS) is the use of electric current produced by a device to stimulate the nerves for therapeutic purposes. TENS, by definition, covers the complete range of transcutaneously applied currents used for nerve excitation although the term is often used with a more restrictive intent, namely to describe the kind of pulses produced by portable stimulators used to treat pain.

Screenshots of Project / Photos of Working Module :

Applications :

1. They use it most often to treat muscle, joint, or bone problems that occur with illnesses such as [osteoarthritis](#) or [fibromyalgia](#), or for conditions such as low [back pain](#), [neck pain](#), [tendinitis](#), or [bursitis](#)

Project Title : **Voice Controlled Lift**
Domain (Area of Project) : **Biomedical**

Name of Project Guide : **Trupti Patel**

Name of Students :

Ruchi Dukhande (ruchidhukhande@gmail.com)
Sayali Satam (sayalisatam14@gmail.com)
Siddhant Bendkar (sidbendkar@gmail.com)
Akshay Bhoite (Akshyboite214@outlook.com)

Brief Ideas of Project :

1. In this project we are using VOICE RECOGNITION technology.
2. If the people in LIFT want to move to up and down using his/her voice command the lift moves to the required position of that person.
3. Now days we can find huge no. of apartments crowded in nearby area with multi storage building capacity.

Screenshots of Project / Photos of Working Module :

Applications :

1. For convenient operation of lift for physically challenged or paralyzed people.
2. To provide secondary option for floor selection in lift.

Project Title : **Voice Based Notice Board Using Android**
Domain (Area of Project) : **Biomedical**

Name of Project Guide : **Prof. Pranesh Prakash Naik**

Name of Students:

Darpan Hambire (darpan.hambire@vpt.edu.in)
Aditya Verma (aditya.verma@vpt.edu.in)
Akshay Jadhav(alshay.jadhav@vpt.edu.in)
Aniket Gavdhe (aniket.gavdhe@vpt.edu.in)
Tushar Nateker (tushar.natekar@vpt.edu.in)

Brief Ideas of Project :

Our project is 'Voice based notice board using android".

It acts as a wireless notice board by using android app we can display notes on led or lcd board

This is done by A Bluetooth device which is interfaced with the Arduino board for communication. A 16*2 LCD display is connected to the Arduino to display the information entered.

Screenshots of Project / Photos of Working Module :

Applications :

- 1) Advanced wireless notice board can be used in public transportation areas like Bus stations, Railway stations and even at Airports.
- 2) Voice operated electronic notice board finds its main application in educational premises like schools, colleges, university

Department : Electronics And Telecommunication

Project Title : Automatic Sorting System
Domain (Area of Project) : Instrumentation

Name of Project Guide : Sheetal Bhosle

Name of Students :

Advait Dixit (advaitdixit97@gmail.com)

Sarvesh Mohite (sarvesh.mohite@gmail)

Brief Ideas of Project :

This is an Arduino based project which is used to sort the objects according to their height .

A sensor is kept at a particular height to detect an object coming from conveyer belt.

If sensor detects the object then a robotic arm will pick up that object and place it to the desired location.

Otherwise it will go into a container kept at the end of the conveyer belt.

Screenshots of Project / Photos of Working Module :

Applications :

In small and large scale industries to sort the products based on various

In Robotics application like artificial robotic intelligence.

Project Title : **Wireless Power Transfer**
Domain (Area of Project) : **Instrumentation**

Name of Project Guide : **Prof. Rupali Gaikwad**

Name of Students :

Pushkar Bagayatkar (phb.official@gmail.com)

Neil Dani (neilnd@rocketmail.com)

Nayan Punya (punyarthinayan16@gmail.com)

Saubhag Trasy (saubhag@gmail.com)

Brief Ideas of Project :

Works on the principle of Electromagnetic Induction.

The Transmitter or Source coil is connected to the mains which converts current electricity into electromagnetic waves.

Screenshots of Project / Photos of Working Module :

Applications :

Charge various devices such as mobile phones, laptops, etc.

Replace wall outlets.

Awards if Any for TPP / Paper Publication / Any Other Please specify :

Project Title : **Wireless Mobile Charger**
Domain (Area of Project) : **Instrumentation**

Name of Project Guide : Servesh Gupta

Name of Students:
Sandesh Yadav
Ashley Marques

Brief Ideas of Project : Wireless charger can charge a mobile device with its 5v output voltage. The Wireless Charger works on the principle of electromagnetic Induction. Increasing the turns in the transmitter coil, receiver would increase the rate of transmitted power. Wireless power transmission circuits can be used to charge camera, batteries, mobile phones, wireless mouse, bluetooth headset, etc.

Screenshots of Project / Photos of Working Module :

Applications : To charge camera, batteries , mobiles, etc

Project Title : Automatic Headlight Rotation In Car
Domain (Area of Project) : Instrumentation

Name of Project Guide : Ms Anjali Gharat

Name of Students :

Sonu Pal(sonukumarpal300@gmail.com)

Romil shinde (romil.shinde@vpt.edu.in)

Karan Pardi (karan,paradi@vpt.edu.in)

Mayur Kanse (Mayukanse22@gmail.com)

Praneet Rege (pranitrege@gmail.com)

Brief Ideas of Project :

Our project is 'Automatic Headlight Rotation In Car'.

It act as directional headlights.

This is done by connecting headlights and steering.

Screenshots of Project / Photos of Working Module :

Applications :

- 1) Specially designed for installing in buses riding in ghat road.
- 2) This mechanism is also installed in all types of commercial vehicles such as :
Maruti, Ambassador, Fiat, Mahindra, etc.
